

**AMENDMENTS TO THE CLAIMS**

The following is a complete, marked up listing of revised claims with a status identifier in parentheses, underlined text indicating insertions, and strikethrough and/or double-bracketed text indicating deletions.

1. (Previously Presented) A method of reproducing a still picture from a recording medium, comprising:

reproducing video data from the recording medium; and

outputting an I-picture and a number of P-pictures as a still picture based on management data for managing reproduction of the video data, the management data including indication information indicating whether the video data includes the still picture, and the management data including clock reference information and still presentation information that indicate how long the still picture is to be reproduced.

2. (Original) The method of claim 1, wherein the outputting step outputs P-pictures that represent a same picture as the I-picture.

3. (Previously Presented) The method of claim 1, wherein the number of P-pictures is greater than 1.

4-13. (Cancelled)

14. (Previously Presented) A method of providing a data stream, comprising:

- providing video data; and
- providing management data for managing reproduction of the video data, the management data including indication information indicating whether the video data includes the still picture, and the management data including clock reference information and still presentation information that indicate how long the still picture is to be reproduced.

15-25. (Cancelled)

26. (Previously Presented) The method of claim 14, wherein the management data is separate from the video data and not included in a header for the video data.

27. (Previously Presented) The method of claim 14, wherein the management data is separate from the video data and not directly adjacent to the video data.

28. (Previously Presented) The method of claim 14, wherein the management data and the video data are separated by at least one header, the header including header information for the video data.
